

### **Environmental Surface Disinfection System (ESDS)**

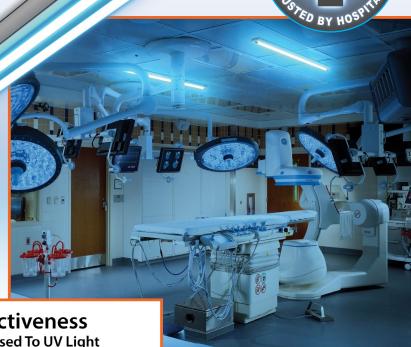

The Environmental Surface Disinfection System (ESDS) from Fresh-Aire UV® Commercial Series addresses the need for surface disinfection in spaces that are prone to biological contamination or where biohazards must be kept to an absolute minimum. ESDS uses germicidal UVC light to disinfect room surfaces when the area is unoccupied. The UVGI system features overhead mounted high-output germicidal UVC light fixtures. Each unit comes with an internal electronic power supply. The Fresh-Aire UV lamps included with ESDS are of the highest quality hard quartz and are encased in a shatter-proof Teflon safety coating.

Because UVC light is dangerous to human skin and eyes the ESDS system only comes on when the area is unoccupied. A timer can be used for start and stop times. Additional safety features can include door-mounted interlock switches to prevent accidental exposure.

#### **Proven Effective**

Fresh-Aire UV Commercial Series
UVC lights are proven to sterilize
99.9% of surface microbial
contaminants within minutes
of exposure. Fresh-Aire UV is
a world leader in UV light disinfection
and indoor air quality.

### UV Antimicrobial Effectiveness Captured Microbe Cultures Exposed To UV Light

Ideal for
Healthcare
& Related
Applications

### **COMMERCIAL SERIES**

### **ESDS System**

- Sterilizes biological contaminants in unoccupied rooms
- Kills airborne germs as they pass by
- Timers and Interlock switches can be used for safety
- Chemical-free disinfection

### **ESDS Advantages:**

- No manpower needed to move disinfection equipment
- Motion sensors (optional) for safe & convenient operation
- Disinfection results within 20 minutes
- Economical yet effective option

The Fresh-Aire UV® AHU Series 1 germicidal UV light system for central air systems features a robust design, durable construction and water-resistant components.

The auto-switching 120-277 VAC power supply is completely sealed for mounting in wet locations. In addition, the UV lamp cables incorporate a waterproof connector design with a 6' lead to allow safe routing of cables within the air handler.

The power supply is available with an optional 120 VAC plug.

#### **BENEFITS**

- Keeps air system cooling coils and interior surfaces free of mold
- Prevents slime build up in drain pan
- Improves energy efficiency
- Reduces need for air system maintenance
- Extends life of air system
- Kills airborne mold, bacteria, viruses
- Improves indoor air quality

#### **FEATURES**

- Water resistant shielded lamp design for stable UV operation
- High efficiency electronic ballast for optimum lamp performance
- Automatic input voltage selection from 120 - 277 VAC 50/60 Hz.
- Lifetime Warranty on all parts except lamp(s)

### Magnetic "Z" Bracket for Easier Installation

Installation of **Fresh-Aire UV™** systems has never been easier! Our revolutionary new **Magnetic "Z" Bracket** eliminates the need for drilling, precise measuring, and fumbling with small screws in the tight confines of the air handler - in fact no tools are required at all to install the bracket!

### MINIU VLED

Mini UV LED is the first-of-its-kind UV light LED system for mini-splits and similar limited space applications.

Like all A/C systems, mini-splits are prone to internal mold growth and microbial contamination, particularly on and near the blower wheel.

The LED light strip in Mini UV LED is designed to sterilize surfaces while having no impact on plastic materials.

### 5 YEAR UV LIGHT LED SYSTEM FOR MINI-SPLITS

#### **BENEFITS**

- Maintains a clean mini-split system free from mold and microbial growth
- Saves energy/reduces maintenance costs
- Extends life of mini-split system
- Improves indoor air quality

#### **FEATURES**

- Fits mini-split & ceiling cassette A/C systems
- UV LED spectrum is safe for eyes & plastics
- Adhesive LED strip is trimmed to length
- 120-277 VAC power supply
- 50,000 hour+ expected LED life
- 5 year warranty on all parts

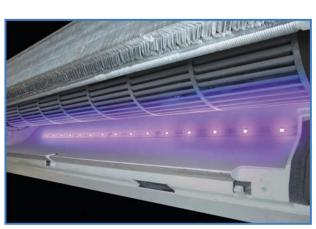

# FRESH-AIRE VILED
